

## Adding Buttons

Buttons are helpful if you would like to create dynamic, visual links inside or outside of your Aportfolio. This tutorial will walk you through the process.

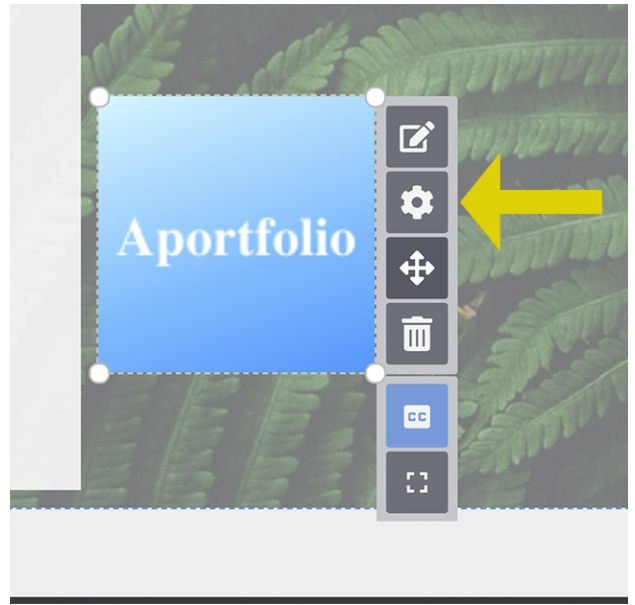

<p><b>Step 1</b></p>	<p>Go to your favorite photo editor either online or using software. You could use Photoshop, Adobe Illustrator, or Pixlr. This tutorial is using Canva.com</p>	
<p><b>Step 2</b></p>	<p>Create your own free canva account and then click Create a design on the top right of the screen.</p>	
<p><b>Step 3</b></p>	<p>Click custom size.</p> <p>If you would like a square button, 125 x 125 pixels is a good size. If you would like a rectangular button, 120 x 90 or 120 x 60 pixels is good.</p> <p>NOTE: you should use pixels as your dimension measurement.</p> <p>Then click "Create new design"</p>	

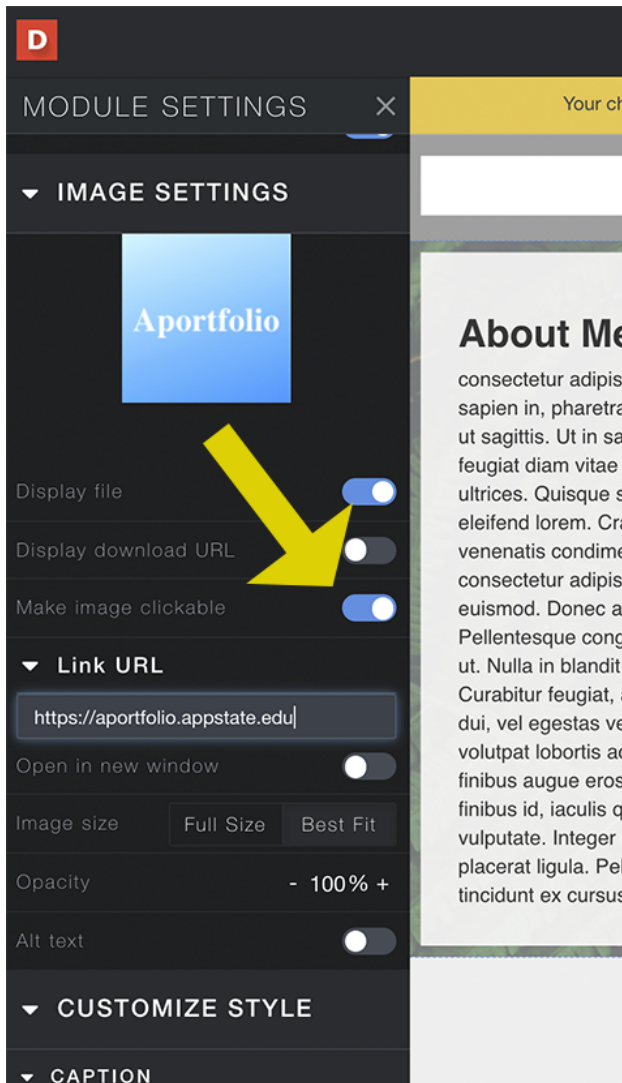

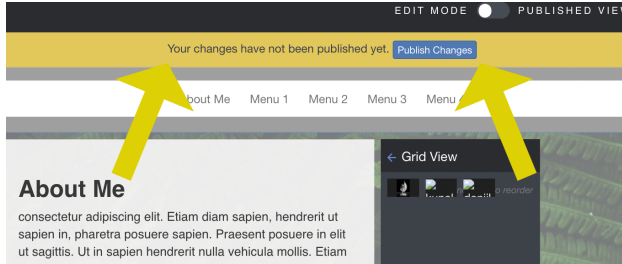

<p><b>Step 4</b></p>	<p><b>Design your button!</b></p> <p><b>Design Tips:</b> Choose a background for your button. Your background should be very simple with no distracting photos.</p> <p><b>NOTE:</b> This background features an ombre blue which is interesting, yet not overly distracting.</p> <p>Choose a simple font for your button. This button uses Times Neue Roman.</p>	
<p><b>Step 5</b></p>	<p>Download or save your button. If you are using a website, download your image as a PNG. If you are using software, you should also save as a PNG.</p>	

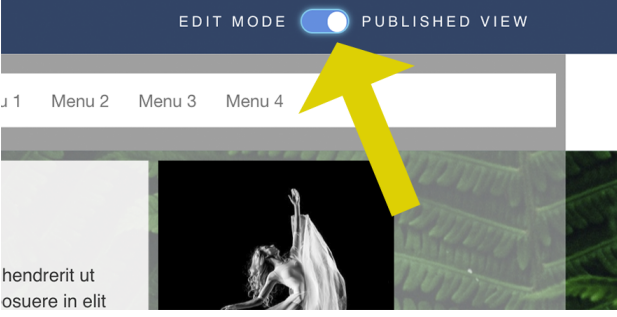

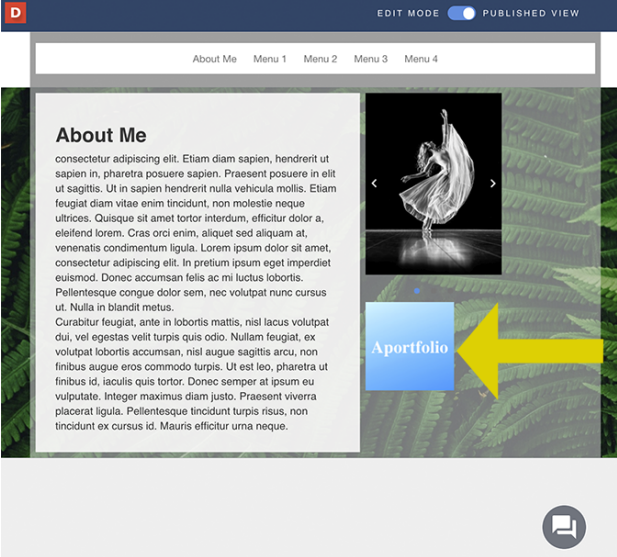

<p><b>Step 6</b></p>	<p>You can either upload the PNG by either dragging it directly onto your page or clicking the blue button and choosing “upload file.”</p>	 <p>The screenshot shows a web page with a navigation menu (About Me, Menu 1, Menu 2, Menu 3, Menu 4) and a main content area with placeholder text. A 'Grid View' overlay is visible, containing a blue plus button and a speech bubble icon. A large yellow arrow points down towards the plus button.</p>
<p><b>Step 7</b></p>	<p>Using the circles in the corner of the image, resize your button as you like.</p> <p>Move the button to its desired location with the multidirectional arrow.</p> <p>Note: If your button looks blurry, it could be because it is stretched. Resizing the image should fix that problem.</p>	 <p>The screenshot shows a blue button with the text 'Aportfolio' on a green fern background. A multidirectional arrow icon is positioned over the button, and a yellow arrow points to it from the right. A vertical toolbar on the right side of the button contains icons for edit, settings, delete, and crop.</p>

**Step 8**

To make your image a clickable link, click on the Settings icon.

<p><b>Step 9</b></p> <p>Under the image settings, turn on “make image clickable” and paste your URL.</p> <p>Note: You can choose whether the link opens a new window in the browser or not. We suggest using open in new browser if you are linking to sites outside of your Aportfolio such as LinkedIn.</p> <p>You may also try messing with the “best fit” and “full image” options as well.</p>	
<p><b>Step 10</b></p> <p>Check that your link is working. To do this, first publish the page.</p>	

<p><b>Step 11</b></p>	<p>Click on the Published View. It's located up and to the right of your menu.</p>	 <p>EDIT MODE <input checked="" type="checkbox"/> PUBLISHED VIEW</p> <p>J 1 Menu 2 Menu 3 Menu 4</p> <p>hendrerit ut osueret in elit</p>
<p><b>Step 12</b></p>	<p>Finally, click on your button.</p>	 <p>D EDIT MODE <input checked="" type="checkbox"/> PUBLISHED VIEW</p> <p>About Me Menu 1 Menu 2 Menu 3 Menu 4</p> <p><b>About Me</b></p> <p>consectetur adipiscing elit. Etiam diam sapien, hendrerit ut sapien in, pharetra posuere sapien. Praesent posuere in elit ut sagittis. Ut in sapien hendrerit nulla vehicula mollis. Etiam feugiat diam vitae enim trincidunt, non molestie neque ultrices. Quisque sit amet tortor interdum, efficitur dolor a, eleifend lorem. Cras orci enim, aliquet sed aliquam at, venenatis condimentum ligula. Lorem ipsum dolor sit amet, consectetur adipiscing elit. In pretium ipsum eget imperdiet euismod. Donec accumsan felis ac mi luctus lobortis. Pellentesque congue dolor sem, nec volutpat nunc cursus ut. Nulla in blandit metus.</p> <p>Curabitur feugiat, ante in lobortis mattis, nisi lacus volutpat dui, vel egestas velit turpis quis odio. Nullam feugiat, ex volutpat lobortis accumsan, nisi augue sagittis arcu, non finibus augue eros commodo turpis. Ut est leo, pharetra ut finibus id, iaculis quis tortor. Donec semper at ipsum eu vulputate. Integer maximus diam justo. Praesent viverra placerat ligula. Pellentesque trincidunt turpis risus, non trincidunt ex cursus id. Mauris efficitur uma neque.</p> <p>Aportfolio</p>
