This tutorial instructs you on how to create parallax scrolling.

Parallax Scrolling will make the background layer photo move slower than the foreground layers when scrolling.
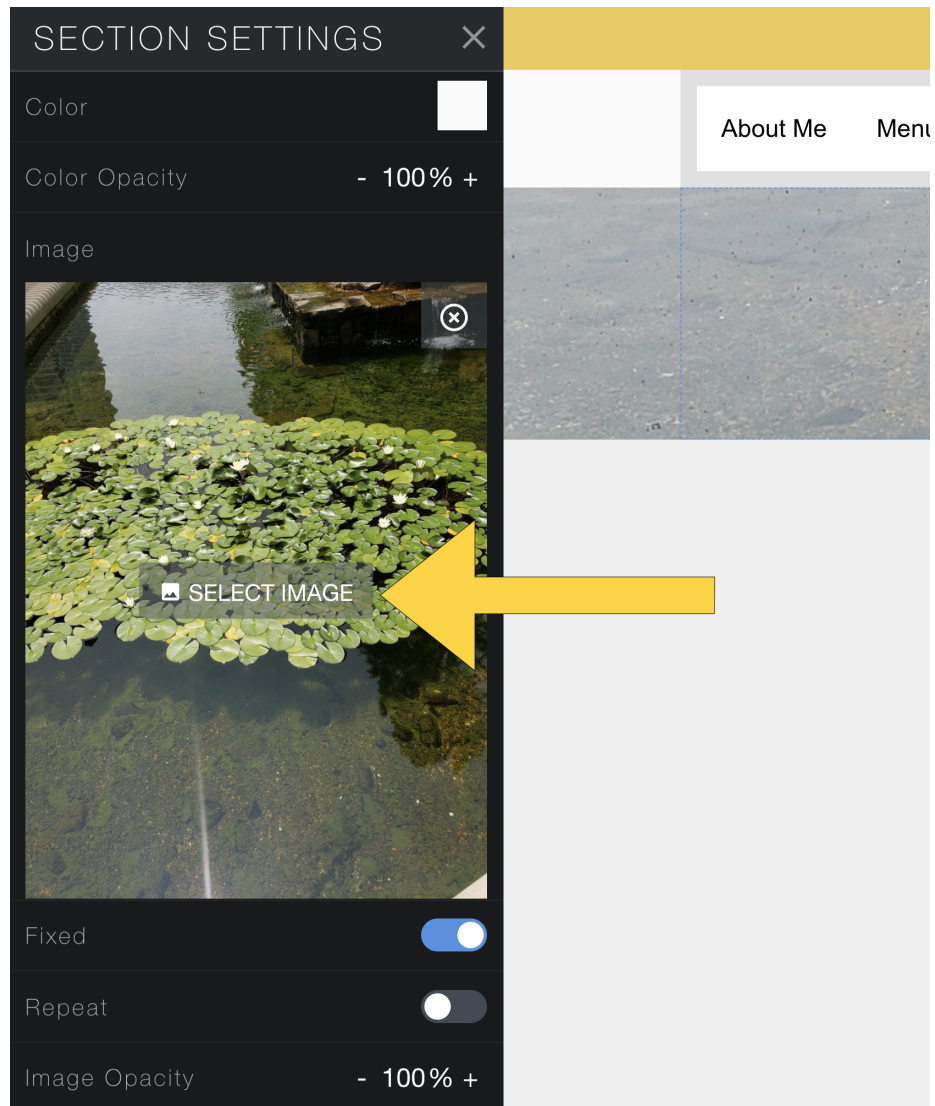

Step 1 To make the background photo do parallax scrolling, hover over the slide and click the settings icon.	

## Step 2

Under bottom layer background, click select image.

Step 3

You can either select a photo by going to previous uploads or upload a new file.

|	
Step 4 Select the image you want to upload.	**PREVIOUS UPLOADS** Fall_Background.png 20190603_124351.jpg 20190530_203537.jpg 20170510_135040.jpg 20190422_173351.jpg 20170510_135035.jpg
Step 5 To make the image able to do parallax scrolling, click the button next to fixed. When it is turned on, it is blue.	SECTION SETTINGS ✕ Color Color Opacity - 100% + Image About Me Menu ⊠ SELECT IMAGE Fixed 🔵 Repeat ⚪ Image Opacity - 100% +

Step 6

To ensure that the photo extends as long as you would like, you may need to increase the size of the blank text box on top of the photo.
